

Active WebTraffic new version 8.1.5 just launched

Active WebTraffic is a powerful and professional web promotion software that includes everything you need to submit, position and promote your web site to over one million search engines and internet directories worldwide. This popular software includes a full set of innovative tools that cover all the web promotion processes in 5 easy steps. Promoting your web to the most popular search engines and to thousands of key directories worldwide, like the Professionals do, has never been easier!

Active WebTraffic includes everything you need to promote, achieve a top ranking and optimize your web site on the search engines. A professional web promotion for your web involves mainly a five step process:

1. Researching your keywords
2. Building, validating and submitting your site
3. Getting listed and obtaining a report on your rankings
4. Optimizing your web pages accordingly
5. Analyzing your conversion

Active WebTraffic is a unique package which covers all the steps of the web promotion process and allows you promote any number of web sites to accomplish your promotion goals. Its search engine database includes over 1 million domestic and international directories to launch your web site to the world. No other tool on the web offers you such a complete coverage.

Among other new features Active WebTraffic version 8 now includes a Google Sitemaps module to easily create a Google sitemap for your web site, a Server Monitoring tool, new Ranking Statistics in graphical format, a Project Manager to handle multiple project submission tasks from a single interface, a Customization function to generate web promotion reports with your own web styles, an Import function to incorporate web promotion projects from external applications or databases and much more.

Download the trial version and put it to work for your site right now.
